

PTH for A38880, slightly taller & no upper socket!

Notes: The pins on VIDC\_BOTTOM are numbered "backwards" because it is really a plug into the mobo socket.  
The socket is also rotated 90deg CCW (seen from the top).  
Pin 17 of VIDC (GND) = pin 2 on socket.  
Pin 18 of VIDC (GND) = pin 1 on socket.  
Pin 19 of VIDC (CKIN) = pin 68 on socket.
